30 CHALLENGES JS IN RAMADAN

It's a simple daily challenge in JavaScript. I upload a video daily starting from the first day of Ramadan until the end of the month. The results have shown that:

- I'm able to discipline myself and commit to uploading a video daily (by writing code, recording a video, and then editing it).
- I'm capable of writing code and explaining it."

(11 March 2024 - 9 April 2024)
